

# NHX update: March 2014

Stockholm (HedgeNordic.com) - Nordic hedge funds had a negative month in March with the NHX Composite losing 0.2%, year-to-date the index is up 1.3%. March was particularly difficult for Managed Futures strategies as markets quickly turned risk adverse during the first half of the month, leading to losses for most CTAs as they held a pro-risk stance going into the month. Losses for Managed Futures strategies were partly offset by gains in fixed income and multi-strategy funds.
