

Nordic Hedge Funds Monthly Review: April 2014

Stockholm (HedgeNordic.com) - Nordic hedge funds were little changed in April with the NHX Composite ending the month down 0.05%.

The month continued to be challenging for Managed Futures strategies (albeit with a wide performance dispersion within the strategy group) while fixed income and multi-strategy funds gained. Equity focused funds suffered slight losses after a solid start to 2014. Fund of Funds struggled during the month bringing year-to-date performance to negative.
