

# Rhenman reopens healthcare fund for new investments

Stockholm (HedgeNordic) - Rhenman Healthcare Equity L/S, the healthcare-focused equity hedge fund managed by Henrik Rhenman (pictured) is opening up to new investors again, a press release states.

The fund closed to new investors in line with the limits set forth by the fund's prospectus by the end of 2015 as it reached 500 million euro in managed assets. The fund is now below 450 million euro which prompts a reopening of the fund, Rhenman and Partners states.

This means that new investors can enter the fund until it reaches the 1 billion euro mark, where the fund will hard close. The fund will offer monthly liquidity even after the hard closure, the press release states.
