

Danske Named Best Fixed Income HF By Hedgeweek

Stockholm (HedgeNordic) – **Danske Capital** took home the award for Best Fixed Income Credit Strategy Hedge Fund at the **Hedgeweek Global Awards 2017**, held last week (March 3) in London.

Danske's Fixed Income Strategy objective is to generate attractive absolute returns by investing primarily in the Scandinavian and European fixed income markets. Value is created mainly through relative/value and convergence strategies. The performance target for the product is the risk free rate of +4%. Risk is limited to 125% of a 10-year Danish government bond measured by Value-at-risk. There are no restrictions on leverage.

Winners of the Hedgeweek Global Awards were decided by a poll of Hedgeweek readers including investors and managers, alongside other industry professionals including fund administrators, custodians, accountants, auditors, law firms, consultant and fund distributors. Winners were confirmed by Hedgeweek.
