

Atlant Fonder Wins Absolute UCITS Award

Stockholm (HedgeNordic) - Atlant Fonder and the Atlant Stability fund was awarded best European multi-strategy fund over one year at the Eurohedge Alternative UCITS Awards which took place in London on October 31. The competition within the category came from international names such as Algebris, ERAAM, MAN and MLIS as well as from Swedish Norron with its Norron Target fund.

In a comment, Atlant's lead portfolio manager Anders Kullberg says:

"We are very happy for this award and see it as a recognition that Stability now is back on track following the weak period that was experienced up until February 2016. We will now continue to work hard to make the fund earn its reputation as 'Sweden's most boring hedge fund'."

Among Nordic nominees that did not make it all the way to the podium were Catella (Catella Nordic Corporate Bond Flex, Catella Nordic Long/Short Equity), IPM (IPM Systematic Macro UCITS), DNB (DNB TMT Absolute Return), SEB (SEB Asset Selection Opportunistic) and Norron (Norron Target).
