

Best Nordic Multi-Strategy Hedge Fund 2020

Stockholm (HedgeNordic) - The term “multi-strategy hedge fund” does not have clear edges and is colloquially used for vehicles that have the discretion to use a combination of strategies across asset classes. Within the Nordic Hedge Index, the multi-strategy category represents the most diverse and inclusive category, featuring unique funds that do not fit any other clear classification.

At 17:00 CET on Wednesday, HedgeNordic announced the winners and runners-up in the “Best Nordic Multi-Strategy Hedge Fund” category supported by AMX (The Asset Management Exchange). The three best-ranked funds in this award category are:

Winner:

Formue Nord Markedsneutral

Second Place:

Ress Life Investments

Third Place:

Nordic Cross Stable Return

Many congratulations to the winning funds! And a warm thank you to the members of the jury board, all supporting partners - with a very special appreciation to AMX (The Asset Management Exchange).
